SUMMARY

AI/ML developer focused on building practical intelligent systems across machine learning, NLP, computer vision, and agentic AI. Experienced in shipping end-to-end AI products with Python, FastAPI, React, MongoDB, transformer models, classical ML pipelines, and LLM-based workflows. Strong in data preprocessing, model evaluation, ML inference APIs, conversational AI, and integrating AI features into usable real-world applications.

EDUCATION

Sagi Rama Krishnam Raju (SRKR) Engineering College, B.Tech 2023 – 2027

- Artificial Intelligence and Machine Learning, CGPA: 8.87

TECHNICAL SKILLS

Programming Languages: C, Java, Python, JavaScript, HTML, CSS

AI/ML: Machine Learning, Deep Learning, NLP, Computer Vision, Agentic AI, LLMs, TensorFlow, Scikit-learn, NumPy, Pandas, Feature Extraction, Model Evaluation

Web Development: React.js, Node.js, Express.js, FastAPI, REST APIs

Databases: MongoDB, PostgreSQL, ChromaDB

Tools & Platforms: Git, GitHub, Jupyter Notebook, Android Studio, MS Power BI, MS Excel, Vercel, Render

Core CS: Data Structures, OOP Concepts

Certifications: Cisco Python Essentials 1, Cisco Python Essentials 2, IBM Deep Learning Fundamentals

PROJECTS

Herb Species Detection API Developed a scalable ML inference API using FastAPI to classify 92 herb species from images; designed a hybrid pipeline combining EfficientNetV2B3 feature extraction, PCA-based dimensionality reduction, and SVM classification, achieving **96.6% accuracy** with probabilistic top-k predictions.

TalentRadar AI Agent Built an AI recruitment workflow that converts job descriptions into ranked candidate shortlists using FastAPI, Next.js, ChromaDB, and a **5-agent** LLM pipeline; implemented semantic search, simulated screening conversations, SSE live result streaming, fallback model routing, and JSON repair for unstable LLM outputs.

Soul Connect Developed a safety-focused AI mental health assistant using FastAPI, React, and MongoDB; integrated sentiment, emotion, and self-harm risk detection with fuzzy-logic urgency scoring, LLM-driven support responses, chat history, voice input, and Twilio-based emergency alerts.

EXPERIENCE

AI Intern, Adverk Technologies Pvt. Ltd. Remote
March 2025 – June 2025

- Built and evaluated supervised ML models for car price prediction and credit-risk style datasets.
- Prepared datasets, handled preprocessing, and compared model performance using standard evaluation metrics.
- Created Power BI dashboards for sales and inventory analysis, converting raw data into cleaner operational reports.

ACHIEVEMENTS

- **Runner-up (Finalist), Smart India Hackathon 2025** – Recognized at the national level in Dehradun for innovative problem-solving, rapid prototyping, and technical execution.
- **Selected Participant, IDE Bootcamp 2026** – Invited to a prestigious national innovation and entrepreneurship bootcamp as Smart India Hackathon finalists, without a separate application process.
- **Winner, Text Sprouts, E-Summit 2K26** – Secured 1st place in a National Level Project Expo for developing a supply chain management solution.

EXTRA-CURRICULAR ACTIVITIES

Executive Body Member, **Association of Computer Engineers (ACE), SRKREC** – organized and coordinated technical and non-technical workshops and college-level events.
