SUMMARY

Full-stack and mobile developer focused on building reliable, user-facing software with React, Node.js, Express.js, FastAPI, Flutter, and MongoDB. Experienced in shipping role-based dashboards, REST APIs, real-time features, authentication flows, admin systems, and mobile-first workflows. Strong in API design, database integration, deployment, and building responsive interfaces for practical product use cases.

EDUCATION

Sagi Rama Krishnam Raju (SRKR) Engineering College, B.Tech 2023 – 2027

- Artificial Intelligence and Machine Learning, CGPA: 8.87

TECHNICAL SKILLS

Programming Languages: JavaScript, Python, Java, C, HTML, CSS, Dart

Frontend Development: React.js, Next.js, Vite, Tailwind CSS, Framer Motion, Responsive UI

Backend Development: Node.js, Express.js, FastAPI, REST APIs, JWT Authentication, Role-Based Access Control

Mobile Development: Flutter, Dart, Firebase Authentication, GoRouter

Databases: MongoDB, PostgreSQL, SQLAlchemy, Mongoose

Tools & Platforms: Git, GitHub, Android Studio, Vercel, Render, Firebase, Postman, MS Power BI

Core CS: Data Structures, OOP Concepts, API Design, Database Design

Certifications: Cisco Python Essentials 1, Cisco Python Essentials 2, IBM Deep Learning Fundamentals

PROJECTS

Prajwalan 2K26 Platform [GitHub](#) | [Live Demo](#)

Developed a full-stack event and hackathon management platform for public pages, admin workflows, evaluator portals, team tracking, live scoreboards, and synchronized 24-hour timers; built the React/Vite frontend and Express/MongoDB backend with JWT authentication, role-based access, and weighted evaluation flows.

AyuSethu Ecosystem [GitHub](#) | [Live Demo](#) | [APK](#)

Built a full-stack medicinal plant traceability platform connecting farmers, collectors, labs, and manufacturers; developed role-based React portals, a Flutter farmer app, Node.js/Express APIs, Socket.io auctions, JWT/RBAC authentication, MongoDB data models, and IPFS-backed verification workflows.

Mana Hospitals App [GitHub](#) | [APK](#)

Built a freelance Flutter appointment and walk-in management app for hospital workflows; implemented patient booking, admin slot logs, Firebase OTP authentication, Express/Mongoose APIs, caretaker booking limits, atomic appointment writes, and IST-based time gates to prevent past-slot walk-ins.

EXPERIENCE

AI Intern, Adverk Technologies Pvt. Ltd.

Remote

March 2025 – June 2025

- Built and evaluated supervised ML models for car price prediction and credit-risk style datasets.
- Prepared datasets, handled preprocessing, and compared model performance using standard evaluation metrics.
- Created Power BI dashboards for sales and inventory analysis, converting raw data into cleaner operational reports.

ACHIEVEMENTS

- **Runner-up (Finalist), Smart India Hackathon 2025** – Recognized at the national level in Dehradun for innovative problem-solving, rapid prototyping, and technical execution.
- **Selected Participant, IDE Bootcamp 2026** – Invited to a prestigious national innovation and entrepreneurship bootcamp as Smart India Hackathon finalists, without a separate application process.
- **Winner, Text Sprouts, E-Summit 2K26** – Secured 1st place in a National Level Project Expo for developing a supply chain management solution.

EXTRA-CURRICULAR ACTIVITIES

Executive Body Member, **Association of Computer Engineers (ACE)**, **SRKREC** – organized and coordinated technical and non-technical workshops and college-level events.
